

QUALITY MONITOR

Your hospital management solution for recording nursing quality indicators.

HIGHLIGHTS

Increase the validity of your quality metrics, eliminate the need for physical record keeping, and reduce the hours spent verifying and entering data manually.

Accurate and complete data collection

Real-time access to quality indicators

Reduction in collection & reporting times

Pressure injuries are expensive to treat.

Estimates show that the annual cost for pressure injuries in the US is **\$11.6B**, with the individual patient care costs rising to **\$125,000**.

QUALITY MONITOR maintains complete & standardized electronic documentation of injury reports, allowing for **targeted training & remediation** for high-incident areas.

Pressure injuries can be deadly.

2.5M people are affected by pressure injuries and **60,000** people die as a result of a pressure injury each year.

QUALITY MONITOR provides real-time access to injury report data giving you the information you need to **quickly address** current or emerging **patient safety needs**.

Pressure injuries are a financial risk.

They account for **26%** of all hospital acquired conditions (HAC). In response, Centers for Medicare & Medicaid Services penalize hospitals with high HACs, resulting in an estimated **\$361M** in lost revenue annually.

QUALITY MONITOR'S interface is designed for speed and efficiency, helping to minimize administrative tasks and **maximize patient care** time.
